SUMMARY

I am currently working as a senior frontend developer. My tasks are to build application structures, decide on development standards, and review every pull request (code review) from my colleagues. I mainly worked on telecommunication domain. Also I am responsible for attending architectural meetings and mostly doing the complex UI integrations with backend services.

EXPERIENCE

Principal Frontend Developer

@Etiya Bilgi Teknolojileri - Istanbul
Feb 1, 2024 - Present

Maya

- Working on an Angular application named GD Toolbox. Angular 17+ with Custom UI-Kit implementation, RxJS, NGXS, Typescript, Sass

Technologies: Angular, ESNext, Fractal, NGXS, React, RxJS, Twig, TypeScript
